To Whom It May Concern: LinkedIn Support

I would like to report a problem related to a trouble maker, this individual has been spreading blatant lies and slander as against Kent Kristensen and Messengerbank. This has already cost Messengerbank \$300 Million USD of lost investment from one investment source. This is the post I am referring to for your review: <https://www.linkedin.com/in/stop-kent-a06a50170/> the ie "Stop Kent, Telegraph Money Messengerbank".

This trouble maker, his name is Aleksander Egorov. He is a Russian National. I do have a copy his passport if you need it for any reason.

This is the story of what happened:

Back in September / November of 2017 we successfully launched an ICO and raised over \$11 Million USD in record time. This is back when we were "Telegraph Money", prior to our development of "Messengerbank".

This was done in the early stages of the ICO market space as we launched DEBC/Telegraf Money in Dubai at the World Blockchain Summit which was a huge hit.

What we didn't realize is that one of the partners "Aleksandr Egorov" was a real scammer; thus the purpose of this letter to you; he is a real piece of work. He has programing training in the blockchain space and has the ability to create calamity in the event that he has access to the passwords, wallets etc that of which he did.

While we had multi-sig crypto wallets, Aleksandr had instructed the webmaster to switch wallet addresses to another wallet only under his control. As as we went to bed in Dubai during the Dubai Summit, as our launch was happening on EST time zone; Aleksandr conveniently timed his planned scam.

We woke up in the morning to see the counter doing really well with our token, but there was no money in the wallet. We asked Alaksandr why? He explained some BS / nonsense to the effect that he needed to insure the project is safe and working properly as we were sleeping. This was utter nonsense as we had team members on almost every major time zone with our CTO monitoring security aspects from the Dominican Republic in which we have a technical presence.

Conveniently when we needed to address this switch in the wallet addresses, Aleksandr turned up ill, supposedly hospitalized in Turkey; which we found out later that he flat out ran out of the country and fled a few days later before we could go and meet him. He ended up hiding out in Mexico.

He is still hiding in Mexico; we know where he is, but there's no point of chasing a criminal such as this man is.

He took off with all the money, he paid some of the employees and we didn't realize any of the proceeds. He flat out stole from us, he stole everything.

We had to suck it up and come up with a peaceful transition and a solution. We did, we had to create everything from scratch, since the original code he coded was really bad and useless for what he had to accomplish.

We ended up creating a new brand "Messengerbank" and compensating everyone that had purchased tokens legitimately from Telegraf Money and issued to them the New minted Messenger Bank Tokens.

As a result of the mess which Aleksander caused from the previous company, his clients had complaints as we learned through WebTransfer, blogs and forums where he promised to compensate his clients with DEBC tokens; when he has already been removed from the company following his embezzlement of the funds.

In a nutshell Messengerbank has honorably swallowed the pill and made it up to our people. It did cost us a lot of time, effort and money but we did it.

That's the summary of the facts and we are fortunate that this regrettable situation happened early on thereby allowing us to prevent deadbeats and future criminals to be totally disassociated with our wonderful set of projects; newer and better structure / endeavor.

Now our team is consisting of top-notch honest hard working members with impeccable sterling records; some of them are so clean and humble they don't even want to take credit for their work and some even work in the shadows in efforts to make sure that we are up and running 100% of the time utilizing and creating cutting edge technology and guiding our direction into a beautiful and future which was simplified.

Should you have any question we will be glad to answer them. Everything we do is documented, backed up and we have amazing credible witnesses.

All the best and we look forward having you on board and thank you in advance as you disable this persons' LinkedIn "Stop Kent" page.

Sincerely

A handwritten signature in cursive script that reads "James Bame".
